

IMDb (*Internet Movie Database*) is a sample database that contains movie-related information, with around (1050000) records for each table.

Check the database at: <https://imdb.to/49kjM0h> ,<https://datasets.imdbws.com/>, and to download the (.CSV) files directly: <https://bit.ly/3uv8QxU> .

Consider the " *IMDb* " database, the relational schema of which is given below, where some relations were eliminated from the original one:

Staff (idStaff, staffName, birthYear, deathYear);

Show (idShow, showType, showTitle, startYear, endYear);

Episode (idEpisodes, idShow*, seasonNumber, episodeNumber);

Principals (idShow*, idStaff*, category);

Rating (idShow*, aveRating, numVotes);

<i>N°</i>	<i>Attributes</i>	<i>Types</i>
1	<i>All ids; numVotes; birthyear; deathYear; startYear; endYear; seasonNumber; episodeNumber;</i>	<i>integer</i>
2	<i>staffName; showType; showTitle; category</i>	<i>String</i>
3	<i>aveRating</i>	<i>real</i>
