

Note:

- prologue bloc → store **caller-saved** in stack
↳ ra register
↳ $s_0, \dots, s_i$ registers
- Epilogue bloc → Restore **callee-saved** ($ra + s_i$)
- caller bloc 1 (before jal)
↳ store **caller-saved** $\rightarrow a_i$ registers
↳ t_i registers
- caller bloc 2 (After jal)
↳ restore **caller-saved** registers

Question

with **a_i / t_i** registers must be saved in stack:
 soto → $cop \neq rd, rs_1, rs_2$] set of instrs after jal.
