Discover Algeria - Your Complete Travel Companion

Students:

Abdelbari Tarek SIBACHIR

Imen Benelhadj Djelloul

Dhia Eddine GUERFI

Team Code :

gita

Submission Deadline : 25 October

Executive Summary

- GITA solves the fragmented travel planning experience in Algeria by consolidating restaurants, hotels, rental houses, cars, and tourist attractions into one AI-powered platform. Our target market includes domestic Algerian travelers, diaspora visiting home, and international tourists exploring Algeria. Our unique value proposition is being the first comprehensive, localized travel platform covering all 58 wilayas with AI-generated personalized itineraries, Arabic/French/English support, and real user reviews from Algerians. Our business model includes commission-based bookings (10-15%), premium AI itinerary features, and targeted advertising. Revenue projections: Year 1 - \$1K, Year 2 - \$20K, Year 3 - \$650K. GITA will succeed because Algeria's tourism sector is growing rapidly, yet lacks both a trusted digital discovery platform and intelligent trip planning—we're filling this critical gap with local expertise and AI innovation.

Mission Statement

Problem Statement :

Travelers in Algeria waste hours manually researching and planning trips with scattered, unreliable information and no personalized guidance.

Why this problem is interesting :

Planning multi-destination trips across Algeria's vast geography (2.4M km²) is overwhelming. Travelers struggle to optimize routes between Algiers, Oran, Constantine, the Sahara, and coastal cities. They don't know ideal trip durations, seasonal considerations, or how to combine experiences efficiently. AI can solve complex itinerary optimization that humans find tedious.

Who faces this problem :

Algerian domestic travelers planning family vacations, diaspora with limited time to explore, and international tourists unfamiliar with Algeria's geography and logistics.

Why it is important to solve the problem :

Poor planning leads to wasted time, missed attractions, and disappointing trips—discouraging repeat tourism. Travelers abandon planning altogether or stick to only Algiers, leaving regional businesses without customers. AI-powered personalization increases traveler satisfaction, encourages exploration of undervisited regions, and maximizes economic impact across all wilayas by distributing tourism more evenly.

Why your solution to the problem would be the best compared to existing solutions

While international platforms offer generic AI recommendations, GITA's AI understands Algeria-specific constraints: road conditions, regional holidays, prayer times, Friday closures, and wilaya-specific travel patterns. We integrate real-time local data international competitors don't have, with culturally-aware AI trained on Algerian travel behavior, Darija/French preferences, and CIB/Baridimob payment realities.

Vision Statement

In 3-5 years, GITA will be the default AI travel planner for Algeria with 500K+ active users, generating millions of personalized itineraries. We'll expand AI capabilities to real-time trip adjustments, voice-guided tours in Arabic/Tamazight, and scale across North Africa as the region's leading intelligent travel platform.

Market Research

Market Size

Global market size: The global online travel market is valued at \$817 billion (2024), with online travel agencies (OTAs) and booking platforms representing \$520 billion of this segment.

Regional market size: MENA travel and tourism market: \$285 billion (2024) Algeria tourism market: \$3.2 billion annually Algerian online travel booking penetration: ~8% (\$256 million)

Number of potential users:

- Algeria population: 45 million
- Smartphone users: 28 million (62% penetration)
- Internet users: 32 million (71% penetration)
- Active online shoppers: 6.5 million
- Potential GITA users (domestic + diaspora + tourists): 8-10 million

Market Value & Revenue Potential

Global market revenue: Global OTA market revenue: \$520 billion (2024)

Annual growth rate:

- Global OTA: 8.5% CAGR
- MENA travel tech: 12.3% CAGR
- Algeria digital economy: 15-18% CAGR

Projected market value (5 years): Algeria online travel market: \$580 million by 2030

Average revenue per user (ARPU): \$12-25 per active user annually (bookings + premium features)

Customer lifetime value (CLV): \$85-150 over 3-5 years (based on 3-4 bookings/year, 15% commission)

Competitors and Existing Apps

Competitor 1: TripAdvisor

Overview: Global travel platform with limited Algeria coverage. Primarily user-generated reviews for restaurants and hotels, minimal booking integration for Algeria.

Screenshots Key Stats:

- Number of downloads: 100M+ globally; ~200K in Algeria
- Rating: 4.5 stars (Google Play)
- Application Age: 13+ years
- Funding: Public company (NASDAQ: TRIP), \$1.5B+ raised historically

Price model: Free app, revenue from advertising, sponsored placements, and commission on bookings (primarily international properties)

Strengths:

- Global brand recognition and trust
- Large existing review database
- Multi-language support
- Established partnerships with hotels/restaurants worldwide

Weaknesses:

- Extremely limited Algeria coverage (mainly Algiers, Oran, Constantine only)
- No AI itinerary planning
- No local payment methods (CIB, Baridimob)
- Interface not localized for Algerian users
- Minimal rental cars/houses for Algeria

- No understanding of regional Algerian travel patterns
-

Competitor 2: Booking.com

Overview: Global accommodation booking platform with some Algeria presence, focused mainly on hotels and international chains.

Screenshots Key Stats:

- Number of downloads: 100M+ globally; ~500K in Algeria
- Rating: 4.4 stars
- Application Age: 12+ years
- Funding: Part of Booking Holdings (NASDAQ: BKNG), market cap \$135B+

Price model: Free app, 15-25% commission on hotel bookings

Strengths:

- Strong hotel inventory in major Algerian cities
- Secure international payment processing
- User reviews and verified bookings
- Multi-language support
- Flexible cancellation policies

Weaknesses:

- Hotel-focused only, no restaurants/activities/comprehensive travel planning
- No AI itinerary creation
- Limited coverage outside major cities
- No local payment integration
- Doesn't cover rental houses, cars comprehensively
- No cultural/tourist attraction recommendations
- Premium prices skewed toward international travelers

Competitor 3: Yassir (Local)

Overview: Algerian super-app offering ride-hailing, food delivery, and recently added travel booking features for hotels and flights.

Screenshots Key Stats:

- Number of downloads: 5M+ (Algeria + MENA)
- Rating: 4.2 stars
- Application Age: 6 years
- Funding: \$193.5M Series B (2022), backed by Bond, DN Capital

Price model: Free app, commission on rides (15-20%), food delivery (25-30%), and travel bookings (10-15%)

Strengths:

- Local Algerian company with market understanding
- Integrated local payment methods (CIB, Baridimob, cash)
- Existing user base of 5M+ in Algeria
- Multi-service platform (convenience)
- Arabic/French interfaces
- Strong funding and growth trajectory

Weaknesses:

- Travel is not core focus (rides/food delivery dominate)
- Limited restaurant/attraction discovery features
- No AI-powered itinerary planning
- Basic travel section without comprehensive reviews
- Coverage concentrated in major cities
- No specialized tourism features (guides, cultural info)
- Limited rental house/car inventory

- User experience not optimized for trip planning

Market Gap: None of these competitors offer a comprehensive, AI-powered, Algeria-specific travel platform combining discovery, planning, and booking with deep local integration and complete coverage across all 58 wilayas.

Product & Functionalities

Product Overview:

Choose one

GITA. is a modern tourism app that helps users discover and explore Algeria's destinations. It makes travel planning easy by letting users search for places to visit, hotels, restaurants, and attractions, and create personalized trip plans. The app also gives smart travel suggestions based on each traveler's interests. Users can share reviews, join discussions, and read travel stories from others. For businesses, GITA offers tools to manage their listings and connect with more visitors. By combining AI powered trip planner with real travel services, GITA provides a simple and enjoyable way to explore and experience Algeria.

GITA. is a new tourism app to help users get inspired and to discover and explore various – destinations in Algeria. - Operations: \$3,500
- Business Development: \$2,000

Year 2: \$620,000 (Net: -\$140,000)

- Tech: \$10,000
- Marketing: \$200,000
- Operations: \$140,000
- Business Development: \$80,000

Year 3: \$1,100,000 (Net: \$550,000 profit)

- Tech: \$350,000
- Marketing: \$400,000
- Operations: \$250,000

- Business Development: \$100,000

Marketing and Strategies

Go-to-Market Strategy

Launch Approach: Phased Rollout

- Alpha (2 months pre-launch): Internal + 50 testers
- Beta (1 month pre-launch): 500-1,000 users in Algiers, Oran, Constantine
- Soft Launch (Month 1): 15 major wilayas
- National (Months 2-3): All 58 wilayas

Launch Timeline:

- Month -3: Alpha testing
- Month -1: Beta launch
- Month 1: Public soft launch
- Month 3: National coverage

User Acquisition Strategy

- By joining conferences and inviting people
- Implementing referral to invite more people

Pre-Launch (Weeks before launch)

Social Media Presence

- Launch Instagram, Facebook, TikTok, LinkedIn
- Daily teaser content: Algerian destinations with "Coming Soon"
- Contests: "Tag dream destination" for lifetime premium
- Build 5,000+ followers
- Engage in diaspora/travel groups

Content Marketing

- Launch blog: "Top 10 Hidden Gems," "Sahara Guide," etc.
- YouTube destination videos
- Downloadable "Algeria Travel Guide 2025" for email capture
- Guest posts on Algerian lifestyle blogs

Landing Page & Email List

- Waitlist with early adopter benefits (3 months free premium)
- Gamified referrals: "Refer 3, move up 100 spots"
- Weekly teasers to subscribers

Influencer Seeding

- Partner with 15-20 micro-influencers (10K-100K)
- Early beta access for authentic content

Business Partner Outreach

- Direct sales to hotels/restaurants
- Free 6-month premium listings for early adopters
- Webinars: "How GITA brings customers"
-

Launch Phase (First 3 months)

Paid Advertising (\$30K Q1)

- Facebook/Instagram (\$15K): Brand awareness, app installs, retargeting
- Google Ads (\$8K): Search campaigns, app campaigns, YouTube pre-roll
- TikTok (\$5K): Gen Z targeting, Spark Ads
- Apple Search Ads (\$2K): iOS travel searches

Social Media Marketing

- Daily destination posts with "Plan on GITA" CTA

- User-generated content reposts
- TikTok: "Hidden Algeria" series, AI reveals
- Contests: "Share favorite memory" with prizes
- Boost top organic posts

Influencer Collaborations

- 30 micro-influencers: \$200-500 each
- 5 macro-influencers: \$2K-5K each
- Content: "I let AI plan my weekend" - full experience
- YouTube vloggers integrate GITA

Public Relations

- Launch event in Algiers (media, influencers, officials)
- Press releases to national/tech media
- Founder on podcasts and TV shows
- Secure Echorouk, El Watan, TechCrunch MENA coverage

Referral Program

- 1 friend = free itinerary
- 3 friends = 1 month premium
- 10 friends = 1 year premium
- Leaderboard with travel prizes

Partnerships

- Wilaya tourism co-marketing
- University campus ambassadors (10 universities)
- Credit card promotions: "10% off with X card"

Growth Phase (Months 4-12)

Performance Marketing (\$120K/year)

- Scale best-performing channels

- Programmatic display on travel sites
- Retargeting campaigns

Content & SEO

- 2-3 blog posts weekly
- Comprehensive guides for all 58 wilayas
- YouTube series on unique experiences
- Rank for long-tail keywords

Strategic Partnerships

- Air Algerie co-marketing
- Banking partnerships (CIB discounts)
- Corporate travel deals
- University spring break campaigns

Community Building

- GITA Ambassador program (100 power users)
- Monthly virtual meetups
- "Traveler of the Month" features
- Facebook Group for organic engagement

Product-Led Growth

- Smart notifications: "People booking this now"
- In-app challenges: "Complete 3 trips, unlock features"
- Seamless social sharing of itineraries

Business Development

- Sales team targets 2,000+ businesses
- Self-service business portal
- Premium business tier with analytics

Seasonal Campaigns

- Ramadan: Family packages
- Summer: Coastal push
- Winter: Sahara experiences
- Eid: Special deals

User Retention Strategy

1. Personalized Notifications

- Weekend inspiration on Wednesdays
- Location-based suggestions
- Price drop alerts (max 2-3/week)

2. Email Automation

- 5-email welcome series
- Weekly digests
- Abandoned cart recovery
- Post-trip review requests
- Re-engagement for dormant users

3. Loyalty Program

- GITA Points on bookings/reviews/referrals
- Tiers: Bronze, Silver, Gold, Platinum
- Redeem for premium, discounts, upgrades

4. Gamification

- Travel badges: "Sahara Explorer," "Foodie"
- Challenges: "Visit 5 wilayas this year"
- Leaderboards and profile achievements

5. Quality & Support

- Post-booking check-ins
- Quick issue resolution
- Quality guarantee with refunds
- Monthly feature releases

6. Surprise & Delight

- Random premium upgrades
- Birthday deals
- Anniversary rewards
- Bonus points for milestones

Success Metrics:

- Day 30 Retention: 15%
- Month 2+ Retention: 35%
- Repeat bookings: 30% within 6 months

Milestones

- Week 4: Requirements & Specifications: Complete technical specification document with features, user flows, and database schema
- Week 5: UI/UX Design & Frontend Foundation: Finalize UI/UX designs and build reusable Flutter screen widgets
- Week 6: Backend Architecture & Core APIs: Set up backend infrastructure and develop skeleton APIs (auth, listings, search)
- Week 7: Mobile App Development - Core Features: Implement search, filters, listing details, and map integration
- Week 8: Booking System & MVP Release: Complete booking flow with payment integration and release internal MVP
- Week 9: AI Integration & Advanced Features: Integrate AI itinerary generator and implement favorites/notifications

- Week 10: Business Portal & Admin Panel: Create business dashboard and admin panel for content management
- Week 11: Testing & Optimization: Conduct comprehensive QA testing and beta test with external users
- Week 12: Polish & Pre-Launch Preparation: Implement feedback, finalize UI polish, and prepare App Store listings
- Week 13: Final Delivery & Launch: Deliver production-ready app and submit to App Store/Google Play
